PROFILE

Information Systems undergraduate at Universitas Airlangga with experience across technology projects, leadership, partnerships, and program execution. Interested in building practical solutions, leading collaborative initiatives, and continuously exploring opportunities across technology and business.

EDUCATION

Universitas Airlangga

Bachelor's Degree in Information Systems

Surabaya, Indonesia

Jul. 2024 – Jul. 2028 (Expected)

PROJECTS

NusaCarbon | *Mobile & Web Carbon-Credit Marketplace*

Feb. 2026 – Jul. 2026

- Built a mobile and web platform that enables project owners to register environmental projects, auditors to verify MRV reports, and buyers to trade verified carbon credits
- Developed the mobile application using Flutter and Dart, with a Java and Spring Boot web/backend system supported by SQL-based data storage
- Implemented carbon-credit issuance, trading, and retirement workflows to improve traceability and prevent duplicate offset claims

Stock Trend Classification | *Financial Data Analysis*

Jun. 2026

- Developed a machine-learning workflow to classify daily price-movement trends for Bank Central Asia stock (BBCA.JK)
- Used Python in Jupyter Notebook, applying Genetic Algorithm-based feature selection to identify relevant variables and Random Forest to perform the classification

Credit Default Risk AI | *Credit-Risk Analysis*

2026

- Developed an analysis workflow to assess borrower default risk using structured credit data
- Used Python and Jupyter Notebook to prepare the data, analyze risk patterns, and interpret the factors associated with potential credit default

Clustering & Customer Segmentation | *Customer Analytics*

2026

- Grouped customer records into meaningful segments based on shared characteristics and behavioral patterns
- Used Python and Jupyter Notebook to perform unsupervised analysis and compare the distinguishing characteristics of each customer group

Car Price Prediction | *Predictive Analytics*

2026

- Developed a regression workflow to estimate vehicle prices from structured automotive attributes
- Used Python and Jupyter Notebook to prepare the data and evaluate how effectively the model predicted prices for unseen vehicle records

PROFESSIONAL EXPERIENCE

Marketing & Partnerships Associate

Jun. 2025 – Mar. 2026

Loka Coffee

Surabaya, Indonesia

- Secured and managed partnerships with 5 external organizations by aligning collaboration objectives, deliverables, timelines, and operational requirements
- Coordinated 3 partner and community events from initial planning through on-site execution, managing partner requirements, timelines, and event logistics
- Negotiated collaboration arrangements that balanced Loka Coffee's business objectives with partner needs to establish mutually beneficial partnerships
- Monitored monthly Instagram performance and adjusted content strategy, increasing monthly views by 321% from 9.5K to 40K and reaching a peak audience of 8,787

Media Production Intern

Jan. 2025 – Dec. 2025

American Spaces

Surabaya, Indonesia

- Produced and edited approximately 3 video projects per month, translating creative concepts into polished outputs aligned with program objectives
- Supported technical production for approximately 4 routine programs per month by handling camera feeds, audio mixing, lighting, and recording setup
- Collaborated with program and content teams to coordinate production requirements and ensure smooth execution of live and recorded activities
- Troubleshooted technical issues in real time during live events, helping maintain uninterrupted program execution

LEADERSHIP & ACTIVITIES

Coordinator, BSI Scholarship Inspirasi UNAIR <i>BSI Scholarship</i>	Nov. 2025 – Present <i>Surabaya, Indonesia</i>
• Initiated and led the BSI Scholarship UNAIR Iftar Gathering for 32 awardees across scholarship categories, creating an inclusive setting that strengthened trust, connection, and a shared sense of belonging • Structured team responsibilities, delegated tasks, and directed end-to-end execution, including venue selection, reservations, operational planning, and event requirements • Coordinated ongoing support for awardees across scholarship disbursement, blazer distribution, training, mentoring, development sessions, and program responsibilities • Initiated the UNAIR Company Profile program for an 80+ awardee community across three scholarship tracks, coordinated availability polling with 72 respondents, and managed 50+ participants during the photoshoot • Collaborated with scholarship coordinators, designers, vendors, and participants to align communications, schedules, budgets, and execution quality	
Academic Project Team Leader <i>Universitas Airlangga</i>	Oct. 2024 – Nov. 2024 <i>Sidoarjo, Indonesia</i>
• Led a two-hour educational program on sexual health and drug-abuse prevention for 91 eighth-grade students across three classes at SMPK Untung Suropati Sidoarjo • Designed and administered pre-test and post-test assessments that demonstrated knowledge gains of 12%–16.67% and increased minimum scores from 60–70 to 80–90	
Treasurer, Class of 2024 Organizing Committee <i>SMA 1 Tawangsari</i>	Nov. 2023 – May 2024 <i>Sukoharjo, Indonesia</i>
• Managed an IDR 60 million budget for batch activities over 7 months, maintaining 100% accuracy in financial records and transaction tracking • Designed and supervised budget allocation strategies for multiple events, ensuring efficient resource use while maintaining event quality • Prepared periodic financial reports that improved transparency and accountability • Coordinated with the management team to deliver a prom event attended by 345 participants	

TECHNICAL SKILLS

Languages: Python, Dart, Java, SQL
Frameworks: Flutter, Spring Boot, Streamlit
Developer Tools: Git, GitHub, Docker, Jupyter Notebook
Data & AI: Data Analysis, Data Preprocessing, Machine Learning, Regression, Classification, Clustering
Software Development: Mobile Application Development, Web Development, Backend Development, REST APIs
